

DOPO 10.1 Tablet Screen Replacement

Removal of the necessary components to replace the screen.

Written By: Michael

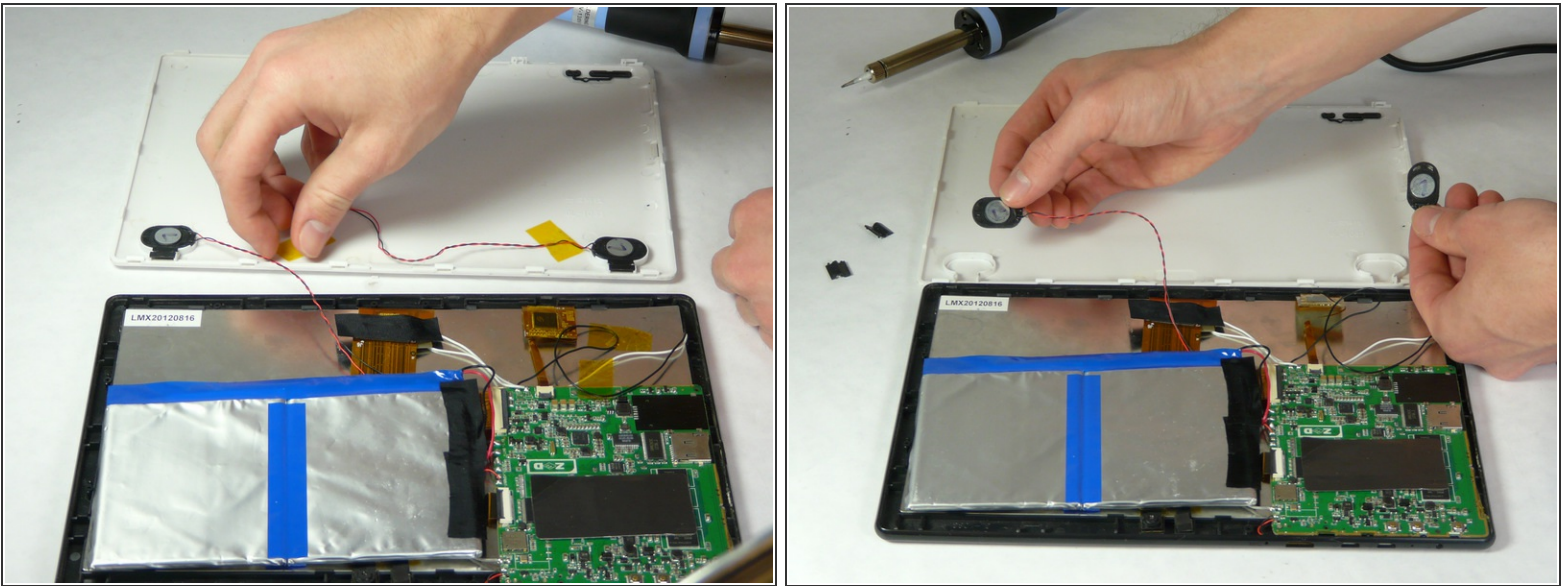

Step 1 — Screen

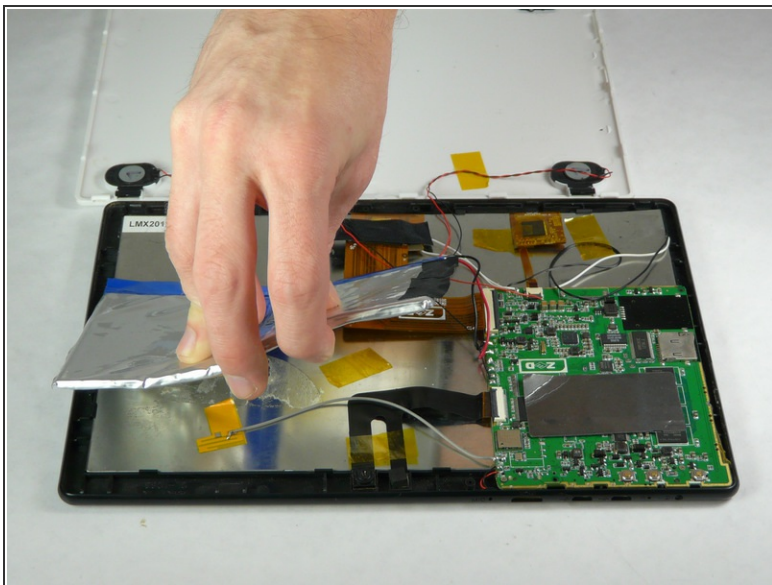

- Remove back case of tablet by taking spudger tool to lift the back plate.

Step 2

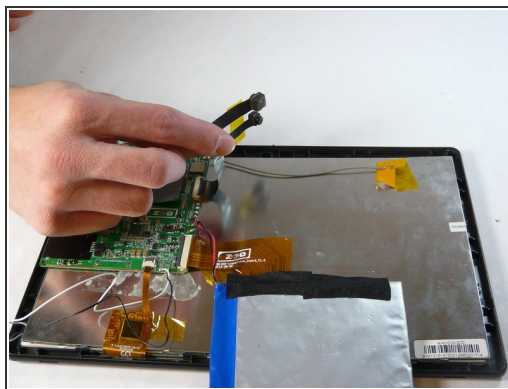

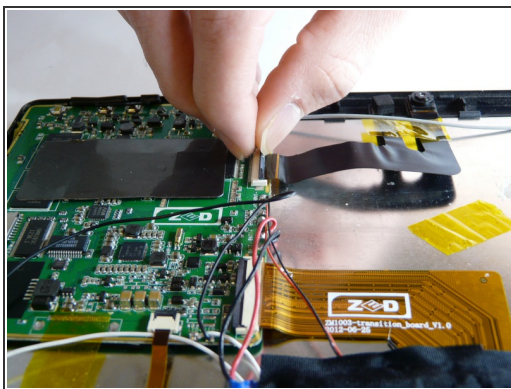

- With caution, unplug speakers from back case of tablet.

Step 3

- Remove battery
- Grab and apply light pressure to battery to release it from the back
- Place off to the side carefully. Be sure not to disconnect cables from motherboard

Step 4

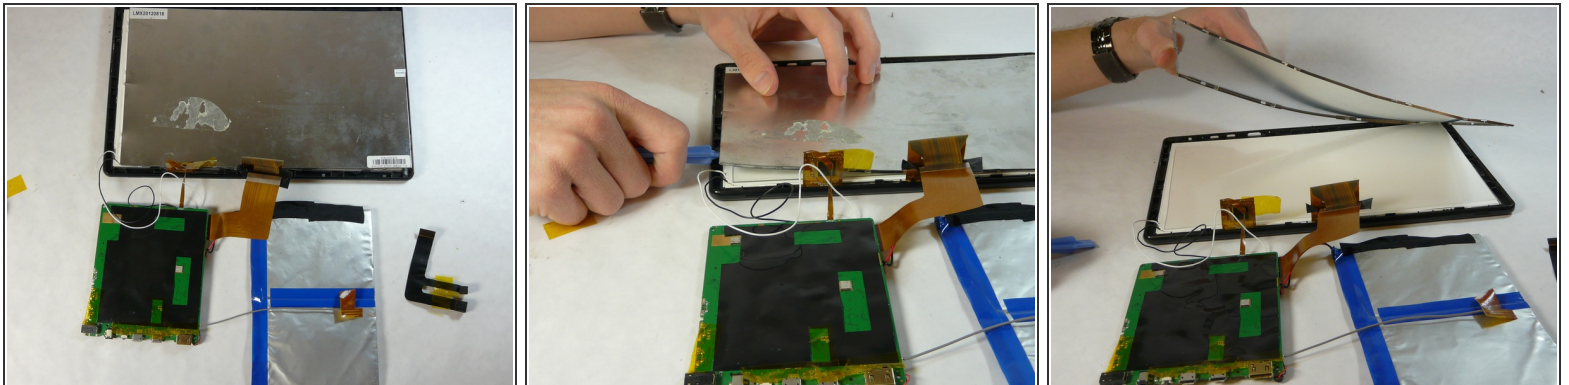

- Locate where the cameras are attached to motherboard
- Now release and remove them from motherboard
- Take camera out and place off to side

Step 5

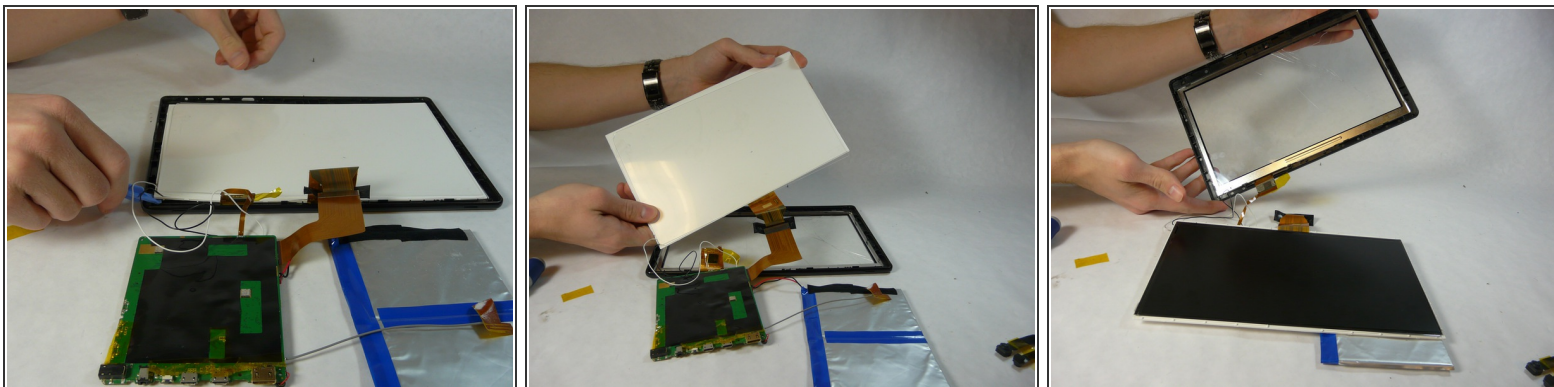

- Remove motherboard
- To do this you will have to unscrew a total of 5 .25in phillips head screws

Step 6

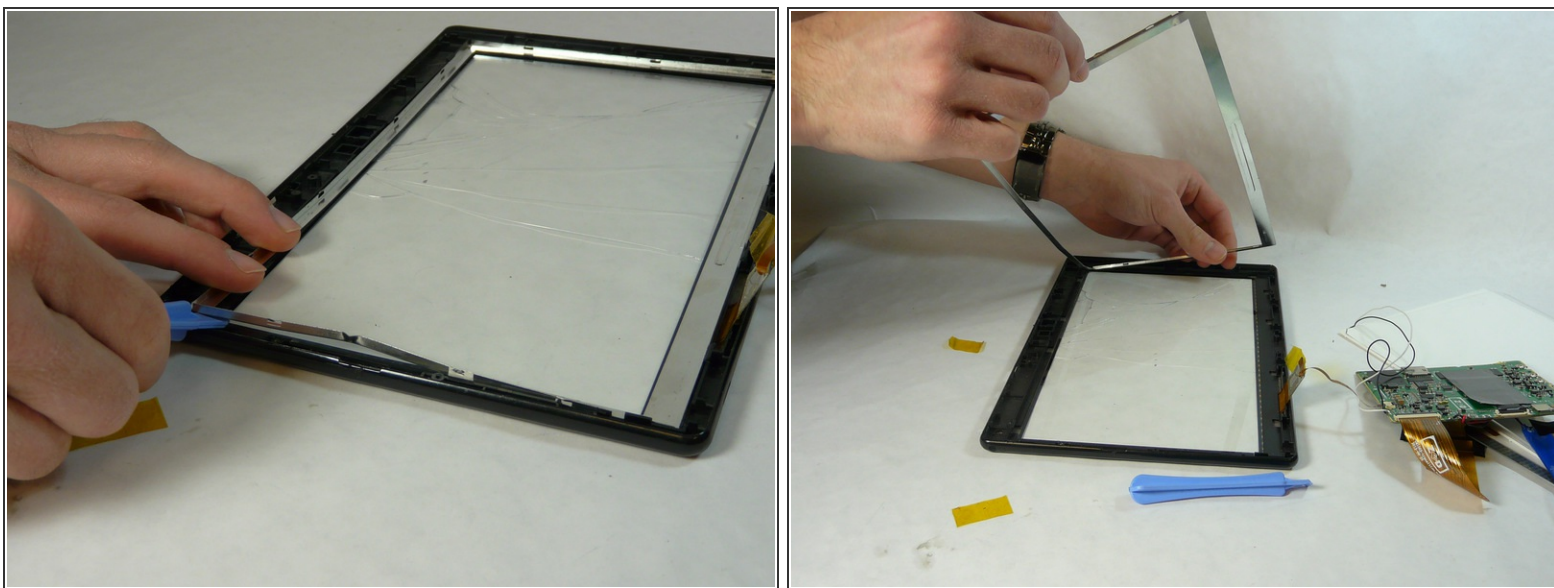

- Remove back metal piece.
- Use plastic pry tool and go around the edges lightly and pop it off.

Step 7

- Using a plastic opening tool, remove the back screen pieces from the back.

Step 8

- Using the plastic pry tool remove metal frame.

Step 9

- Take the iFixit iOpener and place it on the glue
- This will release the glass from the plastic frame

Step 10

- Carefully remove glass. If glass is already broken use gloves to remove glass.

To reassemble your device, follow these instructions in reverse order.
